Secure Cryptographic Enablement Components According To The Current Invention

Docket No: CISCO-3479 EK175755175US Method According To The Present Invention Do Not Initialize Cryptographic Capabilities; Set Warning 212 210 <u>8</u> Initialize Cryptographic Level As Specified Expected Format? YES Identified Crypto Level And Algorithm Identify Highest Level Of Cryptographic During Initial Stages Of System Initialization Use MAC Address Use Identified Crypto Level And To Generate Private Key With Algorithm To Encrypt Token; Support Available On System Use MAC Address For Seed Use Public Key To Encrypt Store Encrypted Token In When Generating Keys; Non-volatile Memory Decrypt Store Token
